News No.: 3

Date: 16. March 2009

INVOLVES: Motor

Accessories

In an effort to ease our customers ordering, stock holding and inventory management, Franklin Electric Europa GmbH is introducing the PSC Motor Kit.

Consisting of the submersible motor, control box, motor short lead and splicing kit all packaged into one compact yet sturdy box, this kit is the ideal stock item to drive your pump.

Why choose the kit over ordering separate items:

- One stop shop – no hassle selecting different components to work together
- Everything available at the same time
- All components matched and warranted by Franklin Electric
- Maximum flexibility – one motor kit can drive as many as 5 different pump models
- Any practical drop cable length (up to 10mm²) can be spliced using included kit

PSC Motor Kits will be available ex stock with immediate effect. Allow 48 hours for commissioning.

For detailed ordering and technical information please consult attached product leaflet or contact your local area sales manager.
